

RECEIPT OF RIGHTS/PROCEDURES CONCERNING CHILDREN
ENROLLED IN PRIVATE SCHOOLS BY THEIR PARENTS

Parents of a child with a disability, who previously received special education and related services from a public school district, who wish to enroll the child in a private elementary or secondary school without the consent of or referral by the school district, and who want the school district to pay for the private school, must provide:

- 1) notice at the most recent IEP meeting before they remove their child from the public school, or
- 2) written notice ten (10) business days before the transfer to the private school.

The notice must explain the parents' concerns about the public school and their intent to enroll their child in a private school at the public school district's expense.

The cost of reimbursement to the parents of the private school expenses may be reduced or denied if:

- 1) the parents fail to provide this notice; or
- 2) the parents fail to allow their child to be evaluated by the school district, at the district's request, before the parents remove the child from the public school; or
- 3) a court finds that the actions taken by the parents were unreasonable.
